

SMARTLIPO MPX™, THE NEWEST BREAKTHROUGH IN LASERBODYSCULPTINGSM

Festus, Missouri, June 29, 2009 – The latest trend in LaserBodySculptingSM, Smartlipo MPX™, is being adopted by doctors throughout the country. Joseph W. Sharlow, M.D., F.A.C.S., Owner of Toni’s Medical Aesthetics & Day Spa, has recently added Smartlipo MPX to his medical aesthetics’ practice. Smartlipo MPX has been getting rave reviews from many doctors and their patients. According to Dr. Sharlow, “Smartlipo MPX goes way beyond the previous generations of Smartlipo. The deep fat tissue treatment and skin tightening (through tissue coagulation) are what my patients have been seeking.” Further, Dr. Sharlow states, “Smartlipo MPX has made laser body sculpting a detailed science and this is reflected in clinical studies and actual results seen in real patients.”

The Smartlipo MPX LaserBodySculpting Workstation is ideal for treating patients who have localized fat deposits, but very lax overlying skin, which would have been made worse by traditional liposuction. Smartlipo MPX is the most current advancement in adjunctive liposuction. In addition to using suction to remove fat cells from the body, Smartlipo MPX uses laser technology and energy to melt fat. When the fat is melted, the blended wavelengths of multiplex technology coagulate and tighten the tissue and induce collagen production.

Despite strict diets and religious exercise, many people just cannot eliminate localized areas of fat, such as around the abdomen or on the upper regions of the arm. With this new laser lipolysis system from Cynosure[®], along with the skills of a qualified and caring surgeon, patients are now able to achieve results they never thought possible. Smartlipo MPX makes it possible to sculpt and tighten the problem areas of the body that have been resistant to change. This minimally invasive procedure requires only local anesthesia and offers a great alternative to traditional liposuction that will literally melt the fat away from areas of the body.

Dr. Sharlow is a board-certified general surgeon who has been in practice for 19 years and has performed over 200 Smartlipo procedures with unbelievable results. Because of Dr. Sharlow’s experience in Smartlipo procedures, Cynosure has designated Toni’s Medical Aesthetics & Day Spa as a training center for the Smartlipo MPX.
