FOR IMMEDIATE RELEASE

**TONI'S MEDICAL AESTHETICS & DAY SPA TO PRESENT A
COMPLIMENTARY SMARTLIPO MPX™ SEMINAR**

Festus, Missouri, August 26, 2009 – Toni's Medical Aesthetics & Day Spa is helping clients get the body they've always wanted by removing areas of unwanted fat with a new FDA-approved procedure called Smartlipo MPX. Smartlipo MPX is laser-assisted liposuction and is often referred to as "laser body sculpting."

On Thursday, September 17, 2009 at 6:30 p.m., Toni's will be offering a free informational seminar to anyone who would like to learn more about this ground-breaking procedure. "I am very excited to be able to share my Smartlipo MPX experiences with others. It is amazing how you can finally get rid of unwanted fat forever," says Dr. Sharlow. Dr. Joseph W. Sharlow is a board-certified general surgeon who has been in practice for over 19 years and has performed over 400 Smartlipo procedures with unbelievable results. Because of Dr. Sharlow's experience in Smartlipo procedures, Cynosure has designated Toni's Medical Aesthetics & Day Spa as a training center for the Smartlipo MPX.

The free Smartlipo MPX seminar will be held on Thursday, September 17, 2009 at 6:30 p.m. at the Holiday Inn Express located at 1200 Gannon Drive, Festus, Missouri. RSVP by calling 636.931.4300 or 888.883.8030 or by email to tonismedical@sbcglobal.net. Seating is limited, so make your reservation today.

If you have tried dieting and exercise, but you just cannot get rid of those love handles or flabby upper arms, then Smartlipo™ Laser Body Sculpting, a minimally invasive treatment, may be the solution due to its ability to permanently destroy fat cells. "With Smartlipo, fat cells are NOT regenerated and you can finally have the body you've always wanted," says Dr. Sharlow. Dr. Sharlow goes on to state, "Smartlipo is excellent for the neck, abdomen, love handles, upper arms, thighs and hips." With Smartlipo, the bleeding, bruising and swelling associated with traditional liposuction is significantly reduced which allows for a quicker return to everyday life. This treatment involves local anesthesia as opposed to the general anesthesia required for traditional liposuction. Some light bruising can occur, but you will be able to return to work in a couple of days and resume exercise after just two weeks.

How does Smartlipo at Toni's work? Smartlipo is a laser-assisted lipolysis procedure that is performed using a tiny one millimeter (1/22 of an inch) tube inserted into the skin. A laser fiber inside of the tube (the cannula) delivers energy directly to fat cells, causing them to melt and drain away as liquid. At the same time, tissue around the area coagulates, resulting in overall tighter skin. Only one treatment is required and results can be seen within one week with continued improvement over three to six months. One of the advantages over traditional liposuction is the skin tightening that occurs with Smartlipo. After the fat is removed from an area, there is excess skin with traditional liposuction; whereas with Smartlipo, the skin contracts and tightens over a period of three to six months.

The cost varies depending upon the body part being treated. Toni's Medical Aesthetics & Day Spa offers complimentary consultations and available financing for people interested in finding out if they can benefit from this new procedure.

Toni's Medical Aesthetics & Day Spa is a full-service medical aesthetics practice located at 1455 U.S. Highway 61, Suite A, Festus, Missouri, only a 30-minute drive from St. Louis. Pricing on our entire line of medical aesthetic and traditional day spa services is very competitive and our clients' privacy is one of our utmost concerns. For more information about the upcoming Smartlipo event, please call 636.931.4300, visit our website at www.tonisrenewyou.com or email us at tonismedical@sbcglobal.net.
